

Training Programs

WEXTRADE
FINANCIAL

Our training programs are currently full. However, we are accepting applications for our next available sessions. A one month training class and the comprehensive nine-month trading program will begin in June 2008. Please contact our Director of Admissions for more information at (312) 881-6200 or toll free at 877-4-WEX-TRADE (877-493-9872). Or send an email to admission@wextrade.com.

Overview of Courses

FOREX Introduction – Course 1

The Forex Introduction course is designed to introduce novice traders to the world of forex trading. You will become acquainted with key terminology in the field of foreign exchange, as well as certain trading strategies and deal types. This general approach will help you understand the broad field of trading and provide you with a foundation on which to expand your knowledge of the industry. This course will also present the concept and practice of online forex trading.

FOREX Essentials – Course 2

The Forex Essentials course is the second part of our introduction to forex trading and expands on the basics learned in the Introduction (Course 1). This course will provide you with in-depth information on the forex market and currency trading. Primary emphasis is on narrowing the focus from the vast world of trading to examining techniques and understanding trading applications.

FOREX Fundamental Analysis – Course 3

The Forex Fundamental Analysis course provides an introduction to forex market analysis and macroeconomics. This course will teach you how to interpret fundamental data and will guide you through the use of particular indicators and their practical applications, a skill that will constitute an integral part of your decision-making process. Fundamental analysis, along with technical analysis (which you will learn about in Course 4), are the keys to successful trading.

FOREX Technical Analysis – Course 4

The Forex Technical Analysis course provides a comprehensive introduction to technical analysis and is designed to teach you the correct applications for technical tools. You will become familiar with the graphs and charts associated with technical analysis, which will allow you to identify market trends and predict future price movements. This course will further prepare you for trading, as it is essential for you to know how to interpret and use specific information before you begin to trade actively. Once you've mastered fundamental and technical analysis, you will be equipped to make informed decisions about your transactions.

FOREX Risk Management – Course 5

The Forex Risk Management course will explore the risks involved in currency and options trading and will teach you how to manage your

account(s) in order to become a profitable trader. This course will help you define yourself as a trader by developing the skills you will need to determine the level of risk you are willing to take. Risk management is one of the main components of a trading strategy, and this course will provide you with the "must and mustn't dos" to help you avoid common pitfalls and teach you the importance of abiding by your risk policy.

FOREX Options/Forwards – Course 6

The Forex Options/Forwards course is designed to teach you about options and forwards so you will learn how to limit your risk and increase your profit. Options and forwards are one of the most complicated types of foreign exchange deals. In this course, you will study additional parameters, such as time, strike price and several other factors which affect the price of an option and forward.
